

UserListener

```
classDiagram
    class UserListener
    class UserDetector
    class Linq
    class Zamus
    UserDetector ..|> UserListener
```

The diagram illustrates a class hierarchy. At the top is the 'UserListener' class. Below it are three classes: 'Linq', 'UserDetector', and 'Zamus'. A horizontal dotted line connects the three bottom classes. A vertical dotted line with an upward-pointing arrowhead connects 'UserDetector' to 'UserListener', indicating that 'UserDetector' inherits from 'UserListener'.
